

Replace Legacy HP1000 ATE Systems with a PC

BT-1000™

HP1000 Emulator System

The BT-1000 Emulator System is an integrated hardware replacement solution that emulates legacy Hewlett-Packard HP1000 A/M/E/F computers and related system hardware.

Run your HP1000 legacy software on a Windows-based PC. Retain your valuable software while only replacing obsolete and troublesome HP1000 computers, disk drives, terminals, and printers with new, reliable, and easy-to-support hardware.

BT-SOFTWARE

The BT-1000 emulation software is pre-loaded on a replacement industrial-grade rackmount computer with equivalent HP1000 footprint. BT-1000 emulates the HP1000 RTE operating system running on a PC without any add-in cards.. The software emulates all of the legacy HP1000 hardware devices (monitors, keyboard, printers, disk and tape drives) on the PC and enables the fully compatible platform to run your legacy software on the PC.

BT-1000 EMULATIONS

Computer

- HP1000 A
• HP1000 M
• HP1000 E
• HP1000 F

Operating System

- RTE-A
• RTE-IVB
• RTE-6

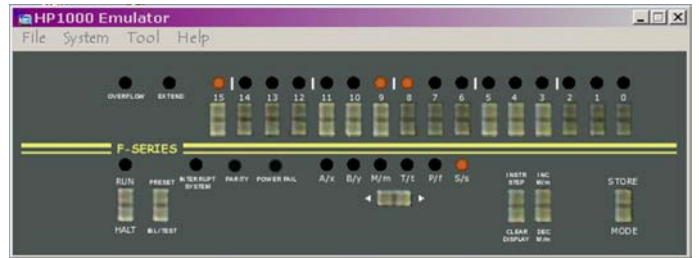

HP1000 Hardware Emulation

- System Monitor (12966A)
• Terminal 2600 Series
• Printer
• HP-IB 59310B
• HP7906, 7920, 7925 Disk Drives
• CS-80 Disk
• Tape

BT-1000 RACKMOUNT COMPUTER

Computer

- Industrial-grade Pentium-based PC
• Equivalent HP1000 Footprint (19" Standard Rack)
• Monitor
• Keyboard
• Optional External I/O Card Cage Box
• Optional Removable Disk Drive

The BT-1000 Interface Simulates the Standard HP1000 Control Panel

The BT-1000 Interface simulates all the control switches as a standard HP1000. Point-and-Click on the interface buttons to configure the RTE operating system and run software programs.
